

My name is Tyara Myers, and I am the Disabilities Inclusion Specialist with Alliance Center for Education. I am pleased to be entering my second school year with Alliance Center for Education, and I can't wait to meet and build relationships with you all! I look forward to a great school year and continuing to bring awareness to the field of mental health and disabilities.

With a background in Speech, Language and Hearing and Applied Behavior Analysis, I am grateful to be in my role as the Disabilities Inclusion Specialist to be able to collaborate with and support instructional staff and parents in implementing and evaluating appropriate inclusion supports for children with developmental and health needs. I coordinate interventions for students with disabilities that allow for participation in the least restrictive environment.

My goals for the 24-25 school year:

- Build strong relationships with our children and families
- Create a safe space and environment
- Be opened minded to new approaches and ideas
- Be a positive influence on those around me
